

## **systemhound Rev 6.0 (systemhound 2009)**

### **EVALUATION COPY**

-----

The free evaluation/demo software is the full software - limited to 10 clients. It does not require a license.

Please refer to <http://www.systemhound.com/wiki/index.php/Category:SH2009> for installation and deployment instructions.

In particular, please see

[http://www.systemhound.com/wiki/index.php/Walkthrough\\_of\\_first\\_install\\_systemhound](http://www.systemhound.com/wiki/index.php/Walkthrough_of_first_install_systemhound)

[http://www.systemhound.com/wiki/index.php/Deployment\\_Strategy\\_systemhound](http://www.systemhound.com/wiki/index.php/Deployment_Strategy_systemhound)

### **LICENSE ACTIVATION NOTES**

-----

When you purchase systemhound, you will be supplied with a License Key. The license key entitles you to a certain number of machine records in the systemhound database.

You should then run license activation from the systemhound console in Run / Programs / systemhound / tools and paste in the license key, run database refresh, exit the console and wait a few minutes to see the license details on the systemhound reporting home page.

### **INSTALLATION / DEPLOYMENT**

-----

Please refer to the wiki documents above for further information. The systemhound server application requires Microsoft .Net 2.0 - you will be prompted to download this by the installer if required. Additionally Adobe Flash Player will be deployed if no version is present.

### **UPGRADING**

-----

If you are upgrading to this release from a previous version, please refer to [http://www.systemhound.com/wiki/index.php/Upgrading\\_to\\_systemhound](http://www.systemhound.com/wiki/index.php/Upgrading_to_systemhound)

[**Please ensure you back up your database prior to upgrading** by copying the Program Files\systemhound\easy-audit folder OR Program Files\systemhound\website folder to a backup location]. ...

### **SYSTEM REQUIREMENTS**

-----

systemhound server: see

[http://www.systemhound.com/wiki/index.php/Install\\_prerequisites\\_for\\_systemhound](http://www.systemhound.com/wiki/index.php/Install_prerequisites_for_systemhound)

systemhound client: Windows 2000 and above
